#### **TD Head and RC Head**

The two available heads for CF2 series (TD and RC) can be equipped with different kinds of blades depending on the media to be cut. Any suitable blade available on the market can be mounted.

#### TD head

RC head

#### **Tangential Cutter**

The tangential cutter steers the blades as it cuts. The motor controlled blade lifts and turns to start every cut at the exact angle. Both die cutting and halfcutting are possible. The tangential cutter enables cutting materials up to 1 cm thickness. Various materials, ranging from soft to rigid, can be cut.

#### **Reciprocal Cutter**

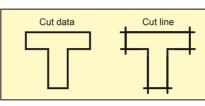

The reciprocal cutter is characterised by up-and-down movements of the cutter blade (7000 times per minute) in addition to tangential cutting. It is especially suitable to cut corrugated board, cardboard and foam materials up to 2 cm thickness.

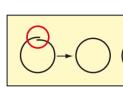

#### Head composition

Head		ΤοοΙ	Pressure	Remarks
	A	Pen / swivel cutter	20 ~ 400 g	
TD	В	Tangential cutter	300 ~ 1,500 g	
	С	Marking gauge roller	1,000 ~ 5,000 g	
RC	A	Pen / swivel cutter	20 ~ 400 g	
	В	Reciprocating cutter	1,500 g fixed	Stroke 2 mm maximum vibration 7,000 times
		Tangential cutter	500 ~ 1,500 g	
	С	High-pressure tangential cutter / Creasing tool	1,000 ~ 5,000 g	

#### USEFUL FUNCTIONS TO SUPPORT CUTTING

Correction of Starting & Ending Points The starting and ending positions of cutting are corrected, which makes cutting of the media smoother. Adjustable within the thickness or hardness of the media is range of 0 to 2.5 mm.

perfect circle.

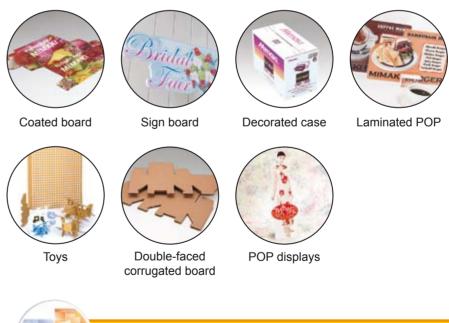

Circle 0 Correction

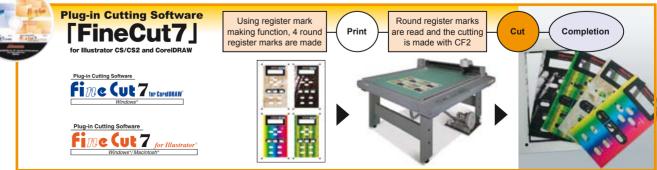

#### **Reverse Cutting**

Reverse cutting is possible by applying mark chips to the back surface. From the front surface, the excess cut cannot be seen, making the finish beautiful.

Cutting conditions such as pressure, speed, correction of starting and ending points, circle  $\theta$  correction, offsets, etc. can be registered for multiple times.

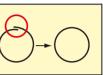

#### POSSIBLE A PPLICATIONS

Declination of the starting and ending point of a circle cutting caused by corrected. This enables cutting a nearly

#### **Press Correction**

The tool pressure is corrected to ensure complete cutting.

#### **Repeated Cutting**

The CF2 Series is capable of repeating the cutting up to a maximum of 5 times changing the cutting pressure, with which you can cut even thick materials with a high quality finish.
